

Facility Overview

CSF Computer Exchange 3 (CX3) is our first venture outside of Klang Valley. It is our hub for the Southern Region of Malaysia. It is mainly designed for co-location and hosting applications in Menara Cyberport, Johor Bahru. CX3 has been in operations since January 2009.

Building

Building area	:	Gross	– 3,000 ft ²
	:	Data Center	– 2,000 ft ²

Building Management

Operations	:	24 x 7 facilities management team at site
EMS	:	Temperature and humidity monitoring
	:	M & E Operations and Power monitoring

Cooling

Temperature	:	18 C to 24 C
Cooling	:	Air Cooled System
Resilience	:	N+1

Fire Detection and Suppression

Detection	:	Addressable heat and smoke detectors
Suppression	:	Water mist system in data center and common area
	:	Gas system in mechanical and electrical area

Telecommunications

Carrier : Access to multiple telecommunications provider

Power

Mains Power : Single 415V incoming
Distribution : 415V busbar system
Generators : Up to 500kVA diesel generators
UPS : N+1 option

Security

Presence : 8 x 5 office personnel; 24 x 7 standby personnel
Personnel : Proximity card readers
Delivery : Managed by security personnel
CCTV : Multiple CCTV cameras monitoring
